

## **FAONS SYMPOSIUM 2021**

### **CALL FOR EXPRESSIONS OF INTEREST**

**FAONS runs a Congress and a Symposium alternately on an approximate 2-year cycle (see below for past meetings)**

So far, FAONS has organized 6 congresses and 4 symposia. The next FAONS Congress will be held in Daegu, Korea in 21-25 Sept 2019, in conjunction with the 10<sup>th</sup> IBRO World Congress. FAONS is now calling for expressions of interest for a member country to run the next FAONS Symposium. Please note that the Presidency of FAONS is undertaken by the President of the Neuroscience Society in the country that is organizing the Congress or Symposium.

The following outlines some of the requirements that will enable the tradition of the FAONS Congress to be maintained.

- Date:** 2021
- Structure:** A FAONS Symposium is generally in association with another neuroscience meeting in the host country, and may consist of a few symposia on specific topics each involving 4-5 speakers. Alternative format will also be considered.
- Funding:** Part-funding is available from FAONS, including limited numbers of travel grant for young investigators. Congress organisers will need to raise supporting funds.

If you are interested in organizing a FAONS Symposium in 2021 please send a brief outline with contact details to the FAONS Secretary:

**Dr. Sung-Jin Jeong**  
**Korea Brain Research Institute, Korea**
